

2015 Hop Rhizomes

Spring will be arriving quickly and Hop Rhizomes will be ready to go!

We will have them available for sale/shipping at the end of March / beginning of April. They are \$6 each or \$5 each for 6 or more, mix or match.

Please place your pre-orders with Butler by Friday, Feb 27th. You can reach us at intown@butlerwinery.com or call 812.339.7233.

One question that is asked a lot is, "What will grow in my climate?" Listed below are the different Rhizomes that we are selling and what climate each variety will grow best in.

Rhizome Varieties

*We have eliminated U.S. Fuggle and U.S. Hallertau only because the Tettang is much more popular. All three varieties are a triploid.

Cascade: 4.5-7.0% alpha. Grows well in all climates. Susceptible to aphid.

Centennial: 9.5 -11.5% alpha. Grows well in all climates. Susceptible to downy mildew.

Chinook: 11.0-13.0% alpha. Grows well in dry, hot climates. Does not grow well in moist climates. Subject to spider mite. Great ornamental hop.

Columbus: 14.5-15.5% alpha. Grows well in dry hot climates. Vigorous but susceptible to mildew diseases.

Golding: 4.0-5.0% alpha. Grows well in mild, moist climates. Does okay in hot climates.

Liberty: 3.0-5.0% alpha. Mild and spicy with subtle lemon and citrus characteristics. Grows well in mild, moist climates.

Mt. Hood: 4-5% alpha. Hybrid of a Hallertau. Grows well in all climates.

Northern Brewer: 8.0-10.0% alpha. Adequate in temperate climates but has difficulty growing when under heat stress. Susceptible to downy mildew.

Nugget: 12.0-14.0% alpha. Grows well in all climates.

Sterling: 6-8% alpha. Hybrid of Saaz. Grows well in all climates.

***Tettang:** 4.0-5.0% alpha. Grows well in a moderate climate. Suffers a little in hot climates.

Willamette: 4.0-6.0% alpha. Grows well in all climates.
