

# The White House

## Just Add Honey Ale

### Ingredients

- 2 (3.3 lb) cans light malt extract
- 1 lb light dried malt extract
- 12 oz crushed amber crystal malt
- 8 oz Biscuit Malt
- 1 lb White House Honey
- 1 1/2 oz Kent Goldings Hop Pellets
- 1 1/2 oz Fuggles Hop pellets
- 1 pkg Windsor dry ale yeast
- 3/4 cup corn sugar for priming

### Directions

1. In a 12 qt pot, steep the grains in a hop bag in 1 1/2 gallons of sterile water at 155 degrees for half an hour. Remove the grains.
2. Add the 2 cans of the malt extract and the dried extract and bring to a boil.
3. For the first flavoring, add the 1 1/2 oz Kent Goldings. Boil for 45 minutes.
4. For the second flavoring, add the 1 1/2 oz Fuggles hop pellets at the last minute of the boil.
5. Add the honey and boil for 5 more minutes.
6. Add 2 gallons chilled sterile water into the primary fermenter and add the hot wort into it. Top with more water to total 5 gallons. There is no need to strain.
7. Pitch yeast when wort temperature is between 70-80°. Fill airlock halfway with water.
8. Ferment at 68-72° for about seven days.
9. Rack to a secondary fermenter after five days and ferment for 14 more days.
10. To bottle, dissolve the corn sugar into 2 pints of boiling water for 15 minutes. Pour the mixture into an empty bottling bucket. Siphon the beer from the fermenter over it. Distribute priming sugar evenly. Siphon into bottles and cap. Let sit for 2 to 3 weeks at 75°.
